

MAINTENANCE AND RECOATING

GacoDeck TopCoat

GacoDeck TopCoat will maintain your GacoDeck waterproofing system by renewing color and increasing durability.

Every 5-7 years apply two maintenance coats of GacoDeck TopCoat mixed with GacoGrip Texture Granules (12 oz./gallon) at a rate of 133 sq. ft. per gallon. No primer is required.

TopCoat will also renew decks coated with acrylic, urethane or Hypalon® waterproofing systems. Apply one coat of GacoDeck Primer before applying two coats of GacoDeck TopCoat.
